

# WASH BINS: Keeping it Clean

It's a beautiful thing—taking the trash bins out to the curb each week and having them emptied of debris—but take a closer look inside the empty containers (if you dare!) and most people will agree it's not a pretty sight!

Enter Kevin Miller and WASH BINS. Kevin launched his trash bin cleaning business in 2019 with the aim to eliminate the unwelcome germs, bacteria and stench left behind in trash and recycling containers long after the trash has been emptied.

“Our specialized sanitization trucks power wash recycling, trash and garden waste bins in 190-degree water, eliminating harmful germs and unpleasant smells,” says Kevin. “We get rid of the germs, flies, poop, spiders and maggots. We disinfect, sanitize, deodorize the inside and the outside and leave it next to your curb 100% clean and smelling great.”

While popular in Europe for over 30 years, trash bin cleaning services began cropping up in the U.S. in the past decade as awareness grows about this important service. Many people don't realize that even after they are emptied, trash bins can carry many dangerous bacteria and diseases, including tuberculosis, e-coli, salmonella and listeria. Regular cleaning eliminates the risk of infection in addition to lingering odors.

Since its launch in 2019, WASH BINS has grown from a small mom-and-pop operation to the largest trash bin and dumpster cleaning company in Southern California. We service over 200 cities in Los Angeles County, Orange County and Ventura County. Ironically, the COVID pandemic likely sparked the growth of his business, says Kevin.

“When we hit a pandemic, the whole range of views and ideas and terminology changed about sanitation,” says Kevin.

“Although nobody knew what would happen during the pandemic, we just kept marketing, believing in the businesses and we kept acquiring customers.”

Here, Kevin provides more details about WASH BINS.

## Q. WHY SHOULD I HAVE MY TRASH BINS CLEANED?

A. It is the best and most convenient way to disinfect, sanitize and deodorize your trash bins. We reduce odors, eliminate filth and germs, and remove flies, maggots and spiders. We leave them looking and smelling great!

## Q. HOW DOES THE TRASH BIN CLEANING SERVICE WORK?

A. Our trash bin cleaning service comes to your house the day after trash collection day. We will service your bins onsite depending on the frequency you sign up for.

## Q. HOW OFTEN SHOULD MY BINS BE SANITIZED?

A. For the most effective results, we strongly recommend sanitizing your bins on a regular basis, either monthly or quarterly. We do our best to clean your bins each time, but it may take a few cleanings to effectively remove grime, buildup and other substances.

## Q. HOW MUCH DOES IT COST?

A. We offer three options: Monthly (\$20/bin), Quarterly (\$25/bin) and One-Time (\$65/bin) services.
